(303) 518-9973

I am a web developer with professional experience as a graphic designer. I have professional experience with JavaScript/TypeScript/jQuery, Angular/React/GatsbyJs, HTML, and CSS/SCSS, and have experience with technologies such as Redux, Firebase, HeadlessCMS, Express, and MongoDB. My previous professional experience as a designer includes logo design, marketing strategies, print production, and managing over 180 apartment websites.

UI Engineer

Tonic Inc ▪ Denver

10/2021 – Present

Worked at a boutique digital agency, developing custom web applications interfaces for various clients

- Transitioned clients to update Shopify themes, creating custom functionality and reconfiguring the store's architecture using Liquid and JavaScript/jQuery.
- Worked on internal projects to be used by our team with NextJs and TailwindCSS.
- Assisted with implementing a new style guide and CDN for a client in the home mortgage industry.

Front End Developer

NeoTreks ▪ Castle Rock

3/2021 – 10/2021

Specialized in building web applications using Angular, focusing on geo-spatial and ecommerce applications.

- Built pixel-perfect user interfaces with Angular 11, GatsbyJS, Material and Bootstrap.
- Focused on building highly scalable code, including reusable components, developing Material/Bootstrap themes, and taking an active role in developing the app architecture and best practices.
- Collaborated with backend developers to assist with integrating GraphQL API with web applications.
- Utilized previous design experience to make recommendations and design pages/graphics when needed.

Front End Developer
